### Limited In-Person Instruction Health Guidelines

#### Parent and student should prepare everyday before going to school
1. Student must wear a face covering before entering bus/school (unless special provisions have been made for a student). Parent should send extra face coverings for student in case they would be needed.
2. Parent should prepare their student to wear multiple layers of clothing as the weather gets colder. There may be windows open for additional ventilation, at times.
3. Parent should provide a reusable water bottle for the student.

#### Parent screening at home before their student goes to school:
1. Does the student, or anyone in their home or community living space have COVID-19 or COVID-19 symptoms (Primary symptoms are: Fever over 100.4, chills, cough, shortness of breath or difficulty breathing)?
2. Has the student been exposed (within 6 feet for at least 15 minutes) to someone with COVID-19 within the past 14 days?
3. Does the student have any other symptoms of excludable disease? - When Should I Keep My Student Home
   
   Yes to any question, and the student may not attend school. Contact a district nurse for further instructions.

#### Only essential visitors are allowed in the school building
1. No parents are allowed beyond the school vestibule unless there is a safety risk for the student.
2. If there is a safety risk, the parent must wear a face covering, use hand sanitizer, and be admitted through the Raptor system. If the system is not working, the parent must fill out the Visitor Health Screening Form.

#### Student entry to the school building and classroom
1. Staff member will greet parent/student at the entry vestibule.
2. School staff will confidentially screen the student using the Limited In-Person Student Health Screening Form with input from student (and parent if present).
3. If the parent stated that they were unable to take the student's temperature at home, the staff member will take a temperature with a thermometer provided.
5. Student to use hand sanitizer upon entry to the building.

#### Classroom

| Wear a Mask. | 1. Staff face coverings are preferred over face shields alone, but there may be times when face shields may have to be used (e.g. the student may need to see the staff member's lips while speaking or for emotional reasons; the staff member may not be able to wear a face covering due to a doctor's recommendation regarding a medical condition).  
2. **If a student cannot adequately wear a face covering** (cannot sufficiently cover a cough), **staff should wear a face shield over a face covering**. At the end of the class/session with a student, staff should clean their shield with Alpha-HP spray cleaner, soap and water, or hand sanitizer. |

<tr>
<td>Staff and student must wear a face covering. Extra disposable 3-ply face masks* (adult and child) are available for students and staff, in the office, if needed. Every staff member was given a cloth face covering and a face shield. Personal face coverings are encouraged.</td>
<td></td>
</tr>
</tbody>
</table>

| Other PPE considerations. | 1. If a student cannot adequately wear a face covering (cannot sufficiently cover a cough), **and** is unable to maintain 6 feet of distancing (staff member has to be in close contact), staff should wear a gown (in addition to a face shield over a face covering).  
2. If a staff member needs to possibly touch a |

student’s body fluids to do the instruction or care for the student’s needs, they should wear **gloves**.

**Watch your Distance.**
Maintain 6 feet of distance between people.

| 1. Place distancing reminder dots* on the floor as needed. 
| 2. Place tape* reminders of where desks and chairs should be located to keep 6 foot distancing. |

**Wash your Hands.**

| 1. Students and staff must wash hands upon entry to the classroom. 
| 2. **Soap and water** are typically available in classrooms for handwashing. Handwashing is preferred over hand sanitizer. 
| 3. Mounted touchless **hand sanitizer** units are located throughout the school building. 
| 4. Bottles of hand sanitizer* are also available for the classroom. |

**Ventilation.**

| 1. All ventilation has been checked at the school. 
| 2. Staff may open windows for extra ventilation as desired, and if it is safe to do so. |

**Cleaning.**

| 1. At any time a staff member may clean in the classroom with Alpha-HP* spray cleaner and soft cloth*. 
| 2. Do not share school supplies or manipulatives between students without first being cleaned with spray cleaner, soap and water, or hand sanitizer. 
| 3. When in use, the rooms should be scheduled to be electrostatically cleaned. |

**Bathroom**

Designate bathrooms that a classroom’s students will be using. Students should not be using other bathrooms unless necessary.

*Staff to contact the building engineer for these supplies.*

- **Face Masks** - adult and child 3ply disposable
- **Face Shields** - adult for staff
- **Gowns** - (to be provided by district nurses at first, if it is determined they are needed for a specific student)
- **Gloves** - (to be provided by district nurses at first, if it is determined they are needed for a specific student)
- **Hand sanitizer**
- **Floor dots for physical distancing, as needed**
- **Tape to mark floor to maintain physical distancing, as needed**
- **Visiofocus Thermometer** and thermometer instructions for screener (to be provided by district nurses)
