Lake Oswego School District’s bond projects are well underway, and our $187 million worth of construction projects are on target. The LOSD bond team has made tremendous progress during one of the most cost-intense times for school construction in Oregon. They’ve overcome short construction windows, skilled labor shortages, and materials tariffs to deliver quality work through value engineering, project timing, and highly productive working relationships with contractors and designers.

Thank you, Lake Oswego residents for your support as we build our future, together.

Dr. Lora de la Cruz, LOSD Superintendent

Skillful Leadership

Tony Vandenberg was appointed LOSD executive director of project management in February 2019, after working with LOSD in a consultant role since March 2018. Tony is an accomplished program and project manager with strong sustainability and technical credentials and extensive experience leading school bond projects throughout the Portland metro area.

Citizen Oversight

We are grateful for the guidance and support from the Bond Accountability Committee (BAC), which is comprised of citizens appointed for their experience in building design, construction, and construction financing, law, contracting, budgeting and/or auditing. BAC assists in monitoring the planning and progress of LOSDs bond program.
